

GISFI Standardisation Strategy and Vision

GLOBAL ICT STANDARDIZATION FORUM FOR INDIA

Arun Golas
(Chairman)

GISFI Standardisation Event

Telecom Engineering Centre, DoT

www.tec.gov.in

February 26-28, 2010

Need for Standardisation

- Ensure quality
- Ensure conformance to desired requirements
- No compromise, even unknowingly or unwittingly, with
 - Personal safety
 - Personal security
 - *Pocket*

Why Standardise Telecom Products?

- Can never be a stand-alone device
- Has to interwork with some other device
- Must follow pre-defined protocols for the service or application
- Standardisation is 'the' only way to ensure conformance

Developments in Telecom

- Next Generation Network (NGN)
 - All packet network
 - End-to-end Quality of Service
 - User controlled parameters
- Standardisation is essential

GISFI Vision

To be an ICT standards forum in India, that develops standards to meet the Indian requirements, as well as contributes towards the evolution of global standards

Objectives

- Represent India in totality
- Unify standardization efforts in India
- Create standards, addressing the specificity of Indian market
- Create an information centre
- Promote Indian initiatives to develop into global standards

Conclusion

- Standardisation aids development
- Permits seamless operations

Thank you
